IMPORTANT

AS THE OWNER/OPERATOR IT IS YOUR RESPONSIBILITY TO WRITE AND CARRY OUT YOUR OWN RISK ASSESSMENTS BEFORE ATTEMPTING TO USE THIS PRODUCT.

Site survey:

1. Carry out a survey of the area where the 'Playzone' will be located, and check for any overhead/underground cables. It's important that this is carried out to avoid ground anchors penetrating underground services, and the 'Playzone' coming into contact with overhead cables when inflated.

Version 1.0 21/09/16

For all guidance relating to the safe use and operation of an inflatable please refer to our Land Operation Manual. A copy of this was supplied with your inflatable, The Land Operation Manual can also be emailed to you upon request.

Airquee Ltd, Duel House, Llandowlais Street, Cwmbran, NP44 7XB, UK

2. You should provide an adequate power supply to the fan, this should adhere to your local power regulations.

Included with your 'Playzone':

To best ensure the protection of accessories for your product (in this case the 4xballs and the safety mats) they will be wrapped inside your inflatable, inside the fan box, or wrapped separately.

Slide Safety Mats

Extra equipment needed in addition what is supplied with your inflatable:

- Suitable 240v Power Supply to operate the fan.

Extra equipment you could consider for your new inflatable:

- Ground sheet to protect the underside of your inflatable
- Sandbag covers to anchor your inflatable indoors.
- Sack truck to move your inflatable safely
- RCD to attach to you extension lead
- Crash Mats

This inflatable can be set up and packed away by 1 person who has had proper manual handling training and uses the correct equipment to move the inflatable.

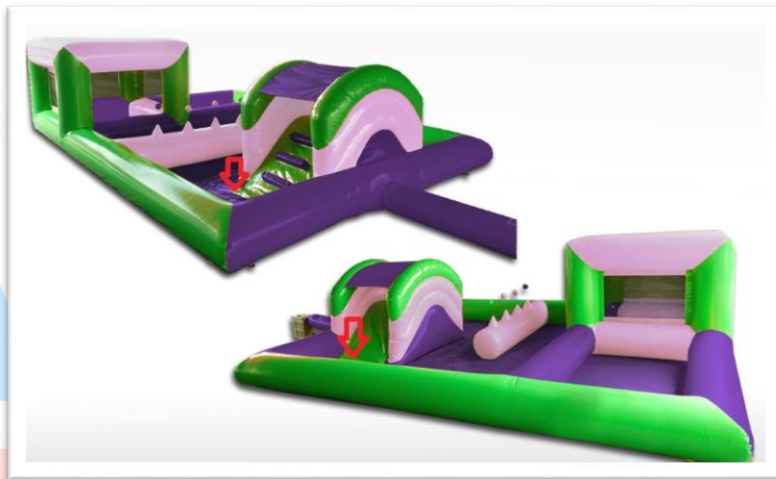

x1

Set up:

1. This inflatable is intended to be used on soft floor and if you are inflating on a hard ground we recommend protective matting to be used under the inflatable. In this case lay out mats so that there are no gaps between them.
2. Unroll and lay out the 'Playzone' onto the mats making sure that every part of the 'Playzone' is contact with the mats, please observe how the 'Playzone' has been rolled as reverse will need to be done after Take Down.
3. Position the fan and attach to the inlet tube and fasten, make sure that other inlet tubes are tied off.
4. Children should not be allowed to come in contact with the fan so this area should be cordoned off.
5. Switch on the fan and inflate.

Important:

The slide has safety mats to cushion the landing. When you set up your unit it is imperative to position the safety mats on both ends of the slide – see image below:

The ball pond also has a safety mat –please note the mat needs to be in its place at all time. When in use the ball pond needs to be filled with balls.
